Wheat.—The movement at primary points has fallen oil somewhat this week, and receipts for the last five days show a loss of 451,000 bushels, compared with the previous week. Flour production continues active, however, and comparatively few complaints are heard regarding the distribution. According to "The Modern Miller" winter wheat already seeded will exceed 42,000,000 acres, and in some districts in the Southwest they are still seeding, mainly in Texas and Oklahoma. Further complains were received of frost damage in Argentina.

decided upon, but will depend on the result of negotiations between the movements. Some were inclined to look upon the supply and demand situation as distinctly bullish, at least for the balance of the present calendar year, and others were of the opinion that there is little probability of much accumulation until well into 1918. # Coffee, Sugar, Tea and Cottonseed Oil

Coffee Futures.—A somewhat steadier tone developed in the coffee market yesterday. While not particularly heavy or urgent, there has been steady liquidation for the last several days, and offerings yesterday morning were lighter. Some trade buying was reported, possibly to undo hedges against sales of actual, but after selling about 3 to 4 points above the previous close demand seemed to have been pretty well supplied. The market closed steady at a net advance of 1 to 3 points. Business included exchanges of December for March at 27 points, for July at 60 points and September 77 points.
